

Apple WiFi “COC-Faculty” - Valencia Campus

This guide is intended to help logon to the Valencia Campus Wireless network. Logging onto the COC-Faculty wireless network grants additional access to ports other than only 80 and 443; which boils down to primarily HTTP and HTTPS websites. We highly recommend removing any COC-Guest or COC-Student network association before utilizing this system.

Click on the **Apple Menu**
Click on **System Preferences...**
Click on **Network**
Click on the **Advanced** button
Remove **COC-Guest** or **COC-Student**
by selecting one and **clicking the Minus button**.

Click on the **FAN** icon in your task bar
Click on **COC-Faculty**
Type staff back-slash “staff” and your user name
(last name, underscore, first initial)
Type your password
Click the **Join** Button
Successful credentials changes your icon from
grey to white and adds a check mark next to the
WiFi network
